

It has just come to my attention that the FCC is considering allowing LPFM stations to take priority over current FM translator service. I would like you to know that I am opposed to this. This would result in the loss of AIR 1 radio in many communities.

Air 1 provides positive music in my community and many others and serves to keep a positive influence to our young people. The effects of removing AIR 1 would be very harmful. Leaving no positive radio influence for our community to listen to would send many listeners back to the sex, drugs, and violent radio that is so prevalent in today's music industry. I think it is plain to see the effects of this type of music in our world today. By giving our communities an alternative to the mainstream music AIR 1 is providing a public service and serves our communities.

Thank you for allowing me to voice my opinion
